The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6 and 13/1-3,6 are rejected under 35 U.S.C. 102(b) as being anticipated by Baker. Baker discloses a heat exchanger with heat conducting element 28 and heat distributing plate 60 between the evaporator tube 61 and the heat generating element 26 (see figure 15 and col. 4, lines 43-74).

Claims 4-5, 10, 12 and 13/4-5,10,12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baker as applied to claim 1 above, and further in view of reference WO 03/008880. Reference WO 03/008880 teaches the use of resistive film heat generating elements 22 and fins between the heat generating element and the evaporator tube (see 22 and 14 of Figure 1). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the system of Baker such that it included the use of resistive film heat generating elements and fins between the heat generating element and the evaporator tube in view of the teachings of reference WO 03/008880.

Claims 7-9, 11 and 13/7-9,11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
